

FUSION

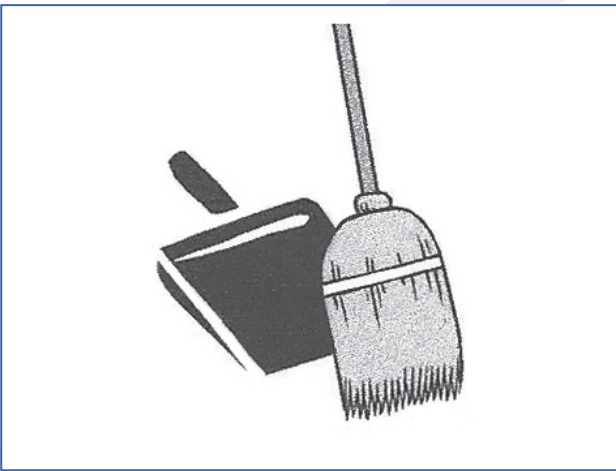

Bioenzymatic Floor Cleaner

Floor Scrubbing Procedures

1

Sweep

loose soils from floor.

2

Scrub

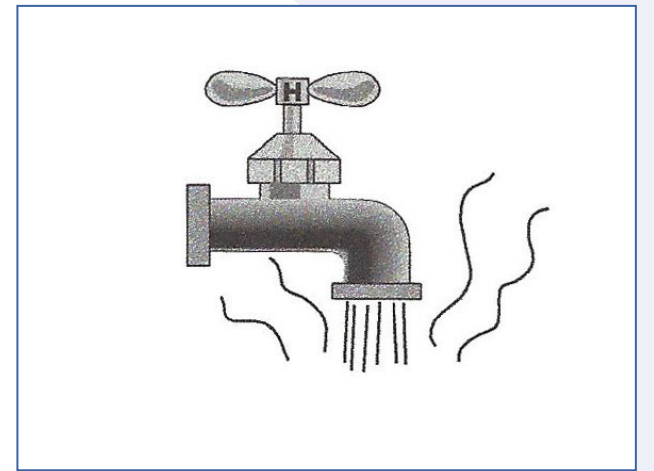

floor-soils with a mechanical scrub brush, or manually scrubbing with a deck brush, or manually scrubbing with a deck brush.

3

Fill

your mop bucket or mechanical scrubber with a detergent solution appropriate for your heaviest soil load. Hot 120°F water is recommended.

4

Apply

no-rinse solution of **FUSION** to the floor.

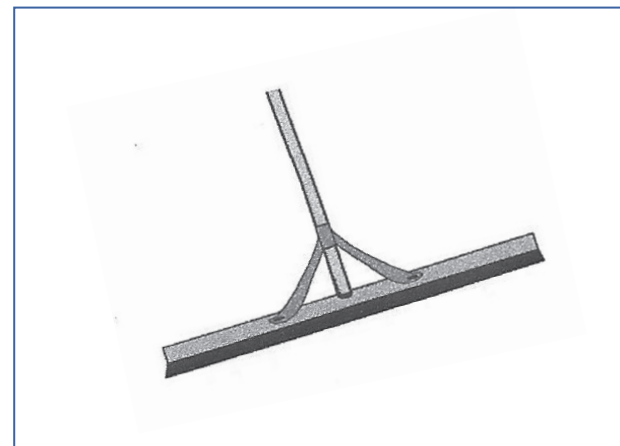

- If cleaning the floor manually, follow your normal mopping procedure.
- If using a mechanical scrubber, follow normal cleaning procedures & recommend scrubber settings.

5

Remove

excess solution by wringing mop or using a squeegee.

6

Air Dry.

Rinsing is not required.
